Fall 2020 Outstanding Graduate Teaching Associate

Watch the University of Arizona Research film on PhD student and Diné (Navajo) hydrologist Nikki Tulley!

Traditional Medicinal Plants

Studying the Legacy of Uranium Mining on the Diné Nation, Samantha Yazzie and Karletta Chief discuss their research on traditional medicinal plants and how they can help adapt agriculture to a hotter, dryer climate.

ENVS faculty Dr. Charles Gerba discuss wastewater-based epidemiology of COVID-19, is present in a community.

ENVS faculty Drs. Malak Tfaily and Albert Barberán are part of the emerging field of ecosystem genomics, which focuses on how the processes of biodiversity production can scale up to influence ecosystems.

Union for the Union

Karletta Chief Honored by American Geophysical Union

Young Scientists Hall of Fame

ENVS faculty Dr. Ian Pepper remembers being a young student in 1970, arriving in the United States from England with $50 in his pocket. He has been a part of the ENVS community since.

SAVE-THE-DATE & Call for Art

ENViSion 2021 a community building event. Our first effort is a call for art from all ENVS students, faculty and staff with the prompt: What do you find inspiring about our environment?

Mark your calendars!

Call for Art:

Anides Morales, Matt Bigler) are hard at work planning this virtual event March 19-20. Details on the 2021 ENViSion website.

Quick Bites

We are so amazed and proud all of doctoral and masters students who will be defending their thesis this year. Congratulations and best of luck!

Sarah Van Glubt (PhD - Brusseau)

Mohammad Gohardoust (PhD - Tuller)

Yadi Wang (PhD - Chorover)

Christina Morrison (PhD - Gerba)

Ariel Leger (MS - Blankinship)

David Huskey (PhD - Hawes)

Edward Chew (PhD - Chief)

Quick Bites

Virtual Events

Report from the Field & Notes from Dept Head

Sarah Van Glubt (PhD - Brusseau) wrote a first-person account of working on the 2020 AGU film about the AGU Ambassador Award. "Poop Doesn't Lie" featuring Dr. Ian Pepper is now available in The Conversation. Click to read in The Conversation.

The spring semester will again present a mix of learning modalities, but we are all getting better at this. In the meantime, take some well-deserved rest and relaxation over this nice winter break.

An effective vaccine rollout promises a semblance of normalcy by May and June. We've struggled to concentrate on our studies. As we return to in-person classes, we can have a semblance of normalcy by May and June.

Our families and friends have been directly impacted by the pandemic. They do not understand what we are going through and they are anguishing over what will happen next for us.
